

CLIENT RELEASE NOTES

V11.8.2

HIGHLIGHTS

Bug Fix	An error appeared when setting red request dots to the grid, seen when you double-click a booking. This has now been fixed
Bug Fix	An issue was found with the Quick Analysis report whereby if you changed the gender of an existing client from female to 'not specified', then run a bill through for them, the QA report bottom 'Total clients visits to Salon' would not count this client.
Bug Fix	In the arrival queue, when choosing 'print selected client' it was found that the printed booking times were incorrect. This has been fixed.
Bug Fix	It was found that in certain circumstances the booking confirmation screen (when finishing placing booking) and appointment summary grid would show the bookings in the wrong order. This has been fixed
Bug Fix	It was found that when booking for specific team members for a specific time of day, a booking could then have its bottom edge dragged down over the top of the next booking. This has been fixed.

Bug Fix	When upgrading to a new iSalon version, if there is another database with a name beginning with a number then this would cause the upgrade to fail. This has been fixed.
Bug Fix	Certain payment values incorrectly rounded in a PaymentSense transaction. Support have found that certain values are being incorrectly rounded to being a penny less, when the payment is sent to the PaymentSense card machine. This has been fixed
