

# CLIENT RELEASE NOTES

## 11.10.3

### HIGHLIGHTS

<b>Bug Fix</b>	<p><b>Possible to break link between the booking and bill</b></p> <p>It was found that, if you stretch or shrink a booking that has already been paid off, and then select to redo this booking, the redo was being prevented.</p> <p><b>This has been fixed.</b></p>
<b>Enhancement</b>	<p>A new button 'Book A New Service for This Client' in the summary, when you double-click an appointment.</p> <p>When the new button is pressed, iSalon will display a message informing the user that they should click on a booking slot to make a booking for this client. When they do so, the Appointment Builder will display with the same client already pre-selected - the user can then create bookings as per usual</p>
